# Abstract

While the world economy is expected to recover to **4 percent growth in 2021**, this is not the case with extreme poverty. World Bank projections suggest that the number of people living in extreme poverty will not change broadly between 2020 and 2021.

This is because most of the very low income population is concentrated in the poorest countries, such as Nigeria, India and the Democratic Republic of the Congo. More than a third of the world's poor are citizens of these three countries.

By creating programs to help **poor people** around the world, **wolf safe poor people** are committed to reducing poverty in the world by using a blockchain system.
